

## **Team # 10**

**Date: 11/13/2019**

### **Summary of feedback and tasks to do**

- Make homepage show recent posts similar to posts page.
- Move the about link to the left under the logo.
- Put one line of text under the search results and homepage
- Make sell and about buttons look the same.
- Make the search results appear in individual cards or put them in a box
- No need to have user email in contact seller
- No Item ID needed in contact seller.
- For messaging seller just create a form in which potential buyer inputs their contact information and there is no further direct messaging. If the seller is interested they can contact the person using the info they provided.
- Simply user dashboard page by making tabs horizontal.
- Add header comments in backend files.

### **List of tasks the team chose to focus on and implement**

- Make homepage show recent posts similar to posts page.
- Move the about link to the left under the logo.
- Put one line of text under the search results and homepage
- Make sell and about buttons look the same.
- Make the search results appear in individual cards or put them in a box
- No need to have user email in contact seller
- No Item ID needed in contact seller.
- For messaging seller just create a form in which potential buyer inputs their contact information and there is no further direct messaging. If the seller is interested they can contact the person using the info they provided.
- Simply user dashboard page by making tabs horizontal.
- Add header comments in backend files.

## **List of P1 functions agreed at the meeting**

- No direct messaging functionality needed and contact the seller can only be a from user fills.
- Administrator uses workbench to approve posts.
- Work on implementing required backend functions as required by p1 front-end needs.
- Making all of the edits to front-end as suggested by Petkovic and agreed during meeting.
